Third Party Logistics Visualized

Logistics Load Board™

Third Party Logistics Visualized

The screenshot shows a window titled "Logistics Load Board" with a grid of 48 load cards. Each card displays a date and time (e.g., "Fri 10:15 53V"), a service type (e.g., "DEDICATED", "REFEER", "ANYVR"), and a route (e.g., "GRAND RAPIDS, MI TAYLORS, SC", "HOLLAND, MI LOUISVILLE, KY"). A tooltip is visible over one card, showing "PAW PAW, MI" and "DISPUTANTA, VA".

Visibility:

- Your logistics in Real-Time directly from your database
- Publicly available via website, workstation, or monitors
- System tray application to notify users to which boards they are assigned and of updates

Customizable:

- Display, sort, filter, and group by your specified fields. Sort by origin, destination, market area, and other fields to help find the information that you are searching.

Technical Specifications:

- .Net 3.5 Multi-User Application
- Active Directory Authentication Integrated
- SQL 2000 or greater

The screenshot shows a "Load Board Configuration" window with the following fields and controls:
